

Penergetic-p Orchard

Recommended products

Product	Designation	No.	Package	Base	Remark
Penergetic-p	plant strenghtener	ap 400302	2 kg	Calcium Carbonate	leaf spraying
Penergetic-k	soil additive	ak 300302	2 kg	Calcium Carbonate	root system

Recommended use

Product	Use	Period	Application	Application method
Penergetic-k	soil preparation	Start of vegetation on the soil	100 bis 300 g / ha	Dissolved in water
Penergetic-p	plant strengthening	1. spraying before flowering 2. spraying after flowering 3. spraying in summer spraying intervals every 2 to 3 weeks. Additional sprayings after heavy rains or according to demand.	100 bis 200 g / ha	Dissolved in water

Analysis of basic material

Calcium Carbonate	
CaCO ₃	98,1 %
MgCO ₂	0,9 %
HCl insoluble	0,08 %
ph-value	9
Ca – content	< 38 %
Density	2,7 g/ml

Trials with Penergetic-p - Please take care about the following:

- The test material should not be stocked in piles or besides.
- The distances between trials should be 1.5 m – 2 m at least (up to 5 m for larger objects).
- Throughout the entire duration of the test, separate watering cans and other utensils are only to be used for the Penergetic products.
- For repetitions we recommend it is essential to use separate jars and utensils, marked in detail, throughout the entire duration of the test.
- Soil tests should always be made in the same plot / lot.
